

What is plate tectonics?

Key Geographical Skills: Physical Geography
Key Geographical Concepts: Physical Processes

Use the knowledge you have gained and the maps provided to **label the world's tectonic plates** on the map below.

Use your knowledge to **match up the sentences** and **rewrite** them below:

the Earth's crust is made up of sections called	continental drift
the gradual movement of continents is called	by 1-10 cm a year
Italy is sandwiched between two plates called	the African Plate and the Eurasian Plate
most of the plates are moving	mountains and valleys
when the plates move, it can create	tectonic plates
