

Germination investigation

Tick the boxes to make sure you have controlled the variables:

- ☐ use the same amount of paper in each well
- ☐ put the same amount of water on the paper
- ☐ count how many seeds are used in each tray
- ☐ put all trays in the same place (if you use individual trays)

Draw what the seeds look like and label the trays with the name of the seed.

Prediction:

I predict that the will germinate first because

Record your results in the table:

You could tick or cross if it has germinated or not. You may want to count seeds.

Write the day you check the seeds here.	Write the seed names here			
				
Day 1
