

Independent Activity

Sort these friction scenarios into scenarios that use a lot of friction and ones that don't.

A lot of friction	Not a lot of friction

the brakes on a bicycle

a tight ring stuck on your finger

slipping on a banana skin

a landslide of wet mud and rocks

using soap to remove a tight ring

a stiff and rusty padlock

slipping on a polished floor

grooves on a bottle top

Add in 4 more scenarios of your own.

Do you think friction is useful? Explain your answer using examples.
