

Activity

How do shadows change during the day?

1. Where will your experiment take place?

2. What will you use to create the shadow?

3. How often will you observe and measure the shadow?

4. How will you record the results?

5. How will you investigate this question? Write a step by step to show how you will conduct your investigation.

First,

Then,

Finally,

Activity

6. What do you predict will happen?

7. Fill out the table below to record your results.
